

# innovi

## For Central Monitoring Stations

### Cloud-Based Video Analytics

innovi for Central Monitoring Stations (CMS) is a video analytics Software as a Service (SaaS) that delivers accurate and automatic detections of security breaches at remote sites with immediate video verification. innovi enables the CMS to expand the number of customers monitored and to increase the level of security offered, without increasing the number of security staff.

### innovi – The Video Analytics SaaS Built for Central Monitoring Stations

- **Focus on What's Important:** Highly accurate real-time intrusion detections and minimal false alarms, with immediate video verification
- **Ready to go in your CMS setup:** Seamlessly integrates with wide range of surveillance cameras and alarm automation software
- **Simple to Deploy and Maintain:** Cameras are innovi-enabled within minutes, no calibration or complex configuration required
- **Ideal for CMS business model:** Pay-per-use monthly billing
- **Partner with the Industry Leader:** Agent Vi leverages over a decade of innovation and experience to deliver the most advanced video analytics solutions on the market

**AGENT** 

Comprehensive Video Analytics Solutions

innovi automatically detects security breaches and generates alarms in real-time, enabling rapid responses as incidents emerge. The alarms and video clips highlighting the security breaches are sent to the alarm automation software for immediate verification, supporting the Priority Response requirements of law enforcement agencies.

### Highlights

- Detection Capabilities
  - Perimeter intrusion by person or vehicle
  - Unauthorized access to restricted areas
  - Loitering
- Video Quality Monitoring
- Video Verification: Video clips include several seconds before and after the breach, helping to eliminate false dispatches
- Rule Scheduling: Activate detection rules according to predefined schedules
- Bulk Operations: Apply analytics operations on groups of cameras
- Low bandwidth requirements, no need to stream video to the cloud

### innovi - Quick and Easy Setup

### Benefits Powered by the Cloud

- Effortless central management of analytics in deployments of all sizes
- Highly scalable service supports unlimited number of cameras
- Seamless and immediate availability of service upgrades
- High service availability, full redundancy and automatic backups
- Accessible from anywhere, anytime, using standard web browser

**Agent Video Intelligence (Agent Vi™)** is the leading global provider of open architecture, video analytics software. Agent Vi's comprehensive video analytics offering includes on-premise and cloud-based solutions, with capabilities extending from real-time video analysis and alerts to video search and business intelligence applications.
