

savVi Statistics Reports – Sample

The savVi Statistics Reports application enables the generation of charts and graphs which illustrate the statistical data gathered by savVi. Following are some examples of types of reports available through savVi Statistics Reports.

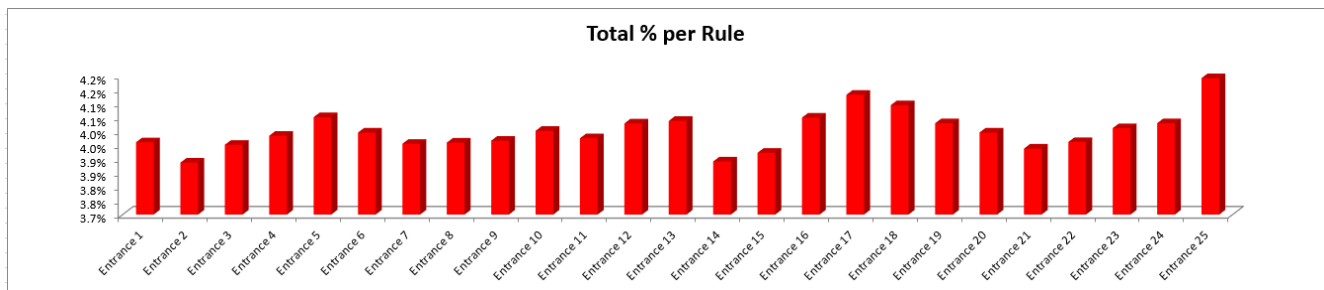

Daily Reports

Statistics presented by user-defined time periods (in this case 3 hour intervals)

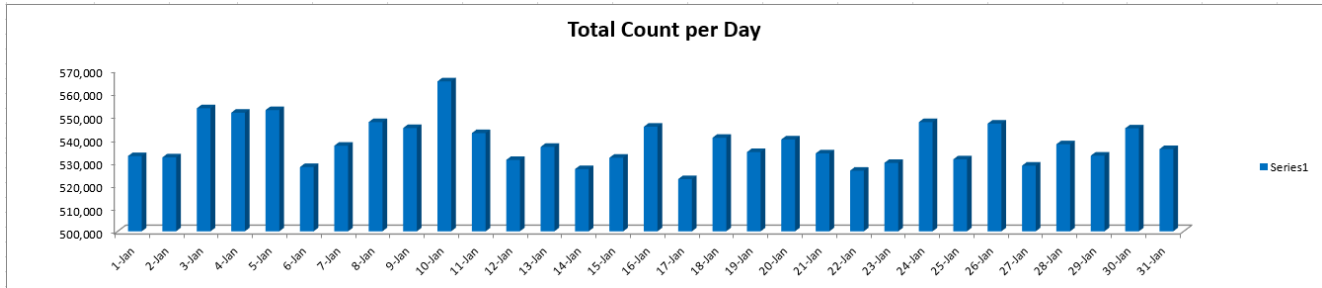

Statistics (numbers) presented for data from multiple cameras

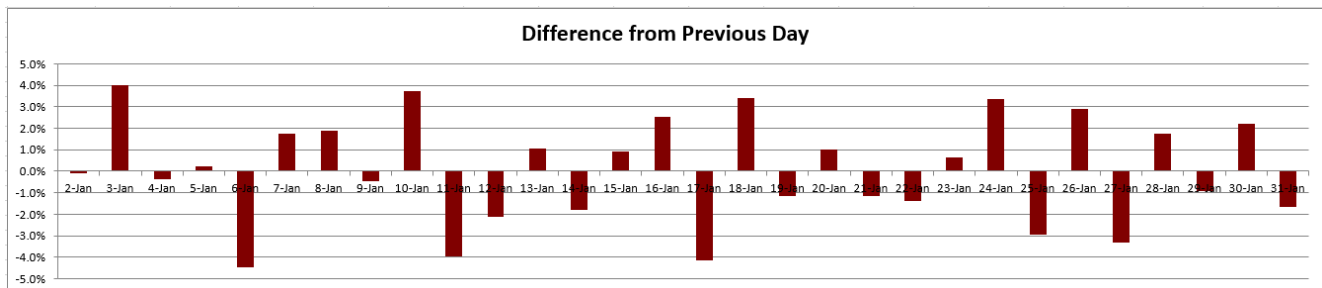

Statistics (percentages) presented for data from multiple cameras

Monthly Reports

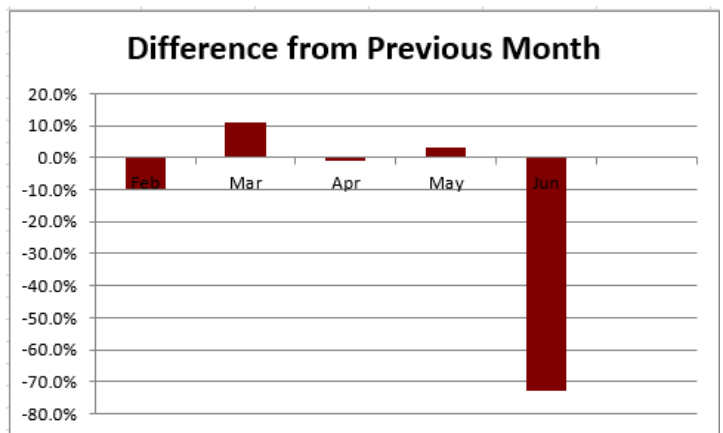

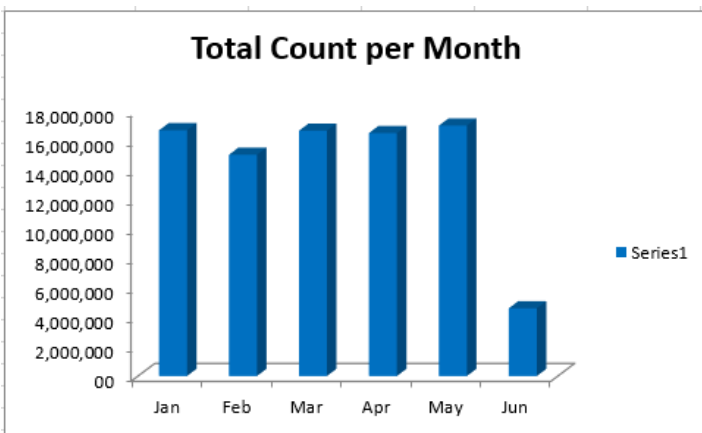

Statistics for each day of the month presented side-by-side, enabling easy comparison of data

Data showing the daily change in traffic from the previous day, enabling easy identification of trends

Yearly Reports

Statistics for each month presented side-by-side, enabling easy comparison of monthly data
Data showing the change in traffic from the previous month
