

innovi Updates - January 2021

Dear innovi User,

Here are innovi's latest feature updates:

- 1 Add case management to the Investigation module
- 2 Add animated object images to investigation results
- 3 Ability to move an edge from one folder to another
- 4 Enhanced camera stream error reporting in the UI
- 5 UI modification on the Monitor and Investigation tabs
- 6 Change RTSP streaming to use TCP by default. UDP and multicast can be selected manually through the UI

Bug fixes:

- 7 Tagged events are not saved in Monitor
- 8 Fix camera import from file
- 9 Schedule changes should take effect immediately
- 10 Improve line crossing rule performance
- 11 Fix innoVi edge memory leaks
- 12 Fix display of camera FPS in the camera dashboard
